Importance: Normal

Matt and Fun-Yuen,

For this particular project I think we are going to build up to 25 to start.

After that it may be many more, but hard to determine. A safe working estimate would be 100.

We need to significantly beat the price of the NUC to make a design change worth our while.

Thanks,

Mark J

Hi Mr. Johnson, and everyone,

Sorry for the delay as I'm still traveling in Chicago.

Our attached products in 4th Gen. Bay Trail (**ulBX-230-BT; VGA**) & 5th Gen. Braswell (**ulBX-250-BW; HDMI**), would compare against Intel Nucs.

May we know a reference quantity and your target cost (with RAM & Storage), to send our offer for your review? Thank you.

Best Regards,

Fun-Yuen Chang

Subject: Intel NUC Substitute

Hi Matt,

Sorry I missed your visit to Bay Tek Games. Will Jenson said you had a possible low cost NUC substitute you could offer us.

I know there are many different variety of NUC's. The NUC we are using is "NUC7i3BNH, 4 GB Mem, 128 GB Sata M.2 SSD, Ubuntu". How close of a cross can you get to this NUC and can I get some pricing?

Will told me this has 15 year support. Sounds really good.

Thanks,

Mark Johnson
